DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 40 – 47, 52 – 53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "if" statements contained in the independent claims render the claims indefinite because it is unclear whether the limitations following the "if" statements are part of the claimed invention. For example, in claim 1, it is possible that no noise was determined or present. If so, in a prior art rejection, all that needs to be found is a reference that determines whether noise is present on at least one port.

In addition, the 112 rejection of claims 40 – 47 and 52 – 53 as detailed in the last Office Action dated 04/14/2010 must still be satisfied with the exception of the term "dynamic threshold value". If the other terms are so well known in the art, applicant should have no problem inserting such terms into the specification by their explanation.

Because of the indefinite problems noted above a proper search could not be conducted at this time.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent

and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 40 – 47 and 52 – 53 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 - 43 of U.S. Patent No. 6,721,411. Although the conflicting claims are not identical, they are not patentably distinct from each other because similar limitations are being claimed. For

example, determining whether noise is present, receiving an audio signal, dynamic thresholds and comparing a characteristic of the audio signal (among others).
